

Business Requirement Document (BRD)

Project Name: Online User Registration System for Educational Institute.

Document Version: 1.0

Author: Prajwal Telsang

Date:

1. Document Revision History

Version	Date	Author	Description
1.0	DD/MM/YYYY	Prajwal	Initial Draft

2. Executive Summary

The objective of this project is to design and implement an online user registration system for the Educational Institute (website). This system will allow unregistered users to create their login credentials through a secure, self-service registration process.

3. Business Objectives

1. Enhance user onboarding experience through self-service registration.
2. Reduce operational workload by eliminating manual registration processing.

4. Project Scope

In Scope:

1. New user credential creation (email/password).
2. Security questions and password recovery setup.
3. Registration confirmation with redirect to login.

Out of Scope:

1. Integration with backend authentication or email systems.
2. Mobile app version of registration (web-only in this phase).

5. Assumptions / Dependencies

1. Internet connection is available to access the web application.
2. Email verification functionality is not required in this phase.
3. UI design follows existing branding and style guides.

6. Stakeholders

1. Product Owner: Business Team Lead
2. Business Analyst: Prajwal Telsang
3. Development Team: Web Development Team

4. QA Team: Internal Testing Team

7. As-Is Business Process

Currently, users cannot register online. Account credentials are sent manually, causing delays and inefficiencies.

8. Current Business Problem

1. Manual process is time-consuming.
2. Lack of personalization and control for new users.

9. Proposed Solution

Users will self-register by providing their email, password, gender, and security questions. On successful submission, they are redirected to a confirmation page and guided to login.

10. Systems Impacted

1. Frontend Web Interface

11. Business Requirements

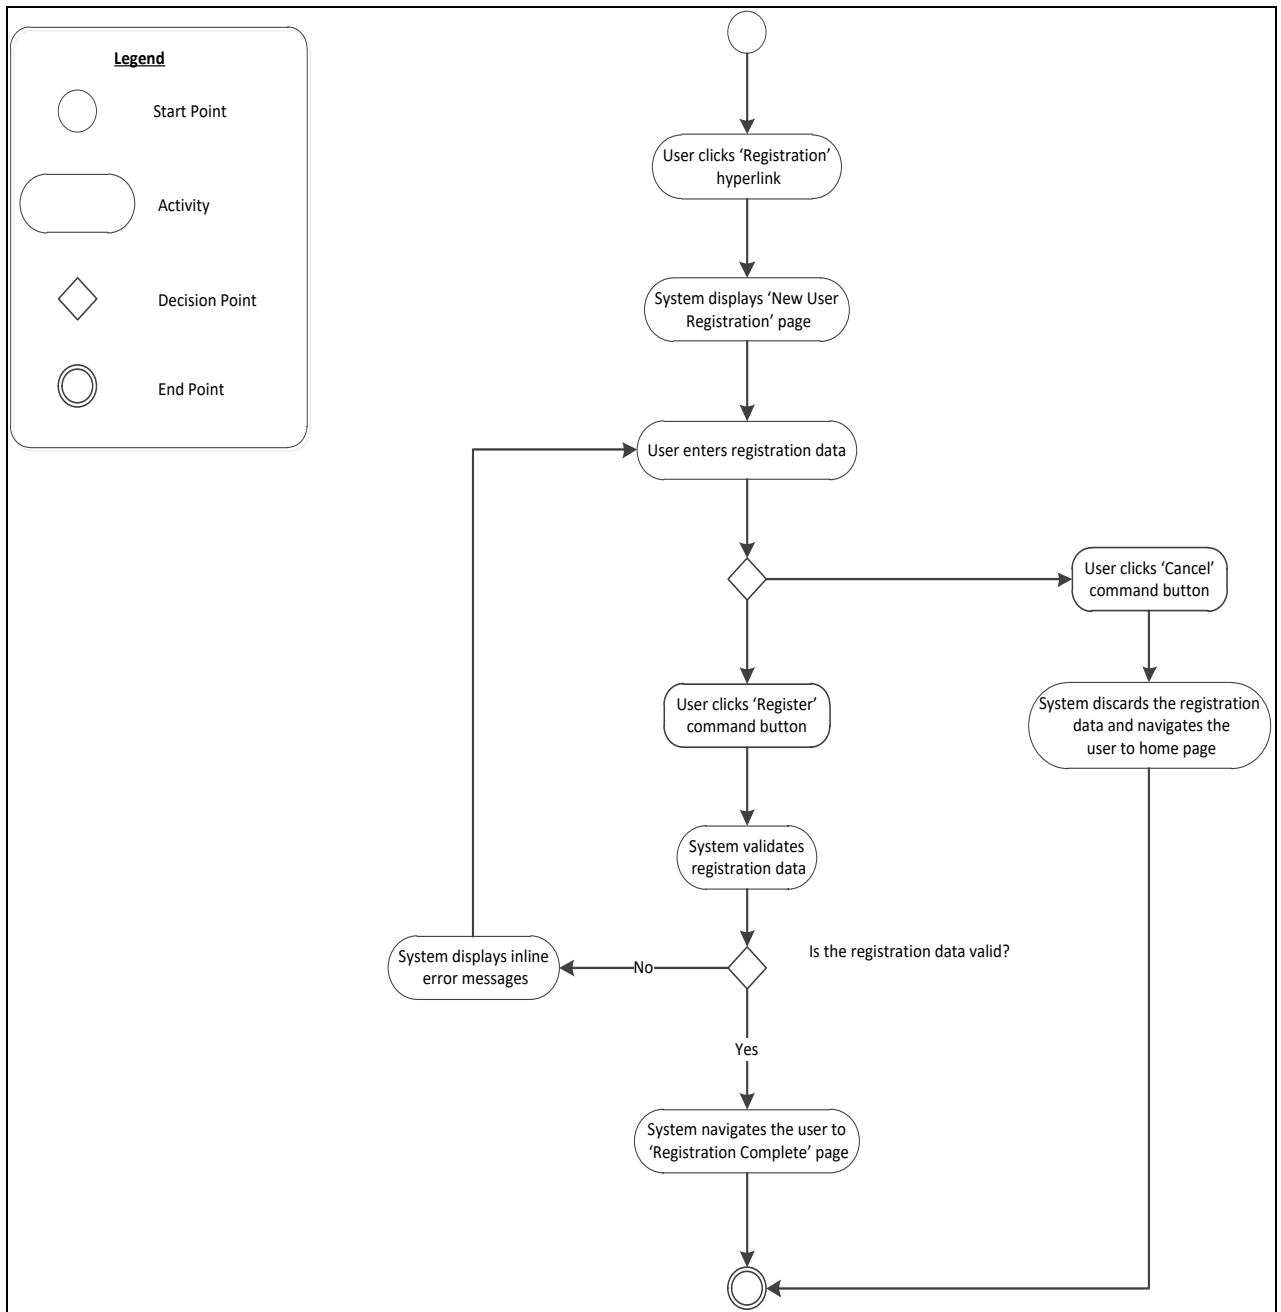

Digital Profile Management

1. Ability for the user to register.
2. Ability for the user to login.
3. Ability for the user change password.
4. Ability for the user to retrieve user id.
5. Ability for the user to retrieve password.

Application Management

1. Ability for the user to apply life.
2. Ability for the user to view status.
3. Ability for the user to cancel.
4. Ability for the user to update.

12. Process Flow

13. Timeline / Milestones

Milestone	Date
Requirements Finalization	
Wireframes & Mockups	
Development Starts	
User Acceptance Testing	
Go-Live
